

CYIOS CORP'S PLEASED TO PROVIDE UPDATE ON RECENT CLINICAL TESTING COMPLETED FOR SANTIZER PRODUCTS CONTAINING ZETRISIL®

Florida, OCT. 27th, 2020 (OTCWIRE) – CYIOS Corp ([OTC PINK:CYIO](#)), a publicly traded company focused on developing and marketing specialty branded products in the Health and Wellness markets, is pleased to provide the following update on recent testing data from clinical studies showing effectiveness of Zetrisil®-based sanitizer products. Clinical data from the studies conducted on three My Shield sanitizing products have shown long lasting sanitizer protection and effectiveness against a surrogate virus for SARS-CoV-2 on skin, hard surfaces, fabrics and clothes.

John O'Shea, CYIO's Chairman stated, "Over recent months, CYIOS has commenced actively marketing alcohol-free, 24 Hand Sanitizer, and My-Shield® sanitizers which incorporate Zetrisil®. Zetrisil®-based technologies are a family of proprietary silicon-based virus killing agents that reduce the presence of the virus from the hands, hard surfaces, fabric and most clothing environments. Zetrisil® effectively protects and/or "shields" the area that "24" Brand hand sanitizer and My-Shield products are applied to from bacterial contamination by way of a long-lasting, cationic-charged, anti-microbial nano-silicone coating. Recent clinical studies completed at University of Alabama in Huntsville prove that Zetrisil®-based products are highly effective and demonstrate persistent activity against the virus causing the current pandemic."

The key to the success of these products is firstly the freedom from alcohol, and secondly the use of the patented silicon-based Zetrisil® with active ingredient Benzalkonium Chloride. The combination provides a powerful sanitizer with long-lasting protection that is more effective than alcohol-based sanitizers which only provides for an instant kill with no long-lasting protection from recontamination. Alcohol-based hand sanitizers can be absorbed into the bloodstream, are flammable, and are only proven effective for a few minutes after each application. These factors make traditional alcohol-based hand sanitizers a less than optimal choice particularly for children, who are less likely to remember to re-apply than adults. Because Zetrisil® is safer than traditional agents and remains on the skin for several hours, people are protected longer without the need for frequent applications of sanitizer — all without the toxicity and flammability concerns of alcohol-based sanitizers.

Mr. O'Shea continued, "The Company is hard at work developing new points of distribution which we look forward to discussing shortly. Our near term focus is on developing market and distribution opportunities around the triple play of sanitizing products that have undergone the recent clinical studies including My Shield Hand Sanitizer, Surface Cleaner and Laundry Complete. The recent testing data is a powerful endorsement of the effectiveness of these products and we are especially excited by the newest testing data showing My Shield surface cleaner effectiveness for an unprecedented 90 day period. We believe we are well positioned with our offerings to consumers, small business owners and larger corporations through this triple play of sanitizing solutions providing some of the industries most powerful and effective sanitizing solutions which have now been successfully tested in clinical studies to show effectiveness against battling the current pandemic."

FORWARD-LOOKING STATEMENTS: This release contains "forward-looking statements." Forward-looking statements also may be included in other publicly available documents issued by the Company and in oral statements made by our officers and representatives from time to time. These forward-looking statements are intended to provide management's current expectations or plans for our future operating and financial performance, based on assumptions currently believed to be valid. They can be identified by the use of words such as "anticipate," "intend," "plan," "goal," "seek," "believe," "project," "estimate," "expect," "strategy," "future," "likely," "may," "should," "would," "could," "will" & other words of similar meaning in connection with a discussion of future operating or financial performance. Examples of forward-looking statements include, among others, statements relating to future sales, earnings, cash flows, results of operations, uses of cash and other measures of financial performance. Because forward-looking statements relate to the future, they are subject to inherent risks, uncertainties and other factors that may cause the Company's actual results and financial condition to differ materially from those expressed or implied in the forward-looking statements. Such risks, uncertainties and other factors include, among others such as, but not limited to economic conditions, changes in the laws or regulations, demand for products and services of the company, the effects of competition and other factors that could cause actual results to differ materially from those projected or represented in the forward-looking statements. Any forward-looking information provided in this release should be considered w/ these factors in mind. We assume no obligation to update any forward-looking statements contained in this report.
